DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Shoji et al. (WO 02/25645).

Shoji et al. discloses the invention as claimed. Figs. 1-58 show the information recording apparatus and medium having information recorded by marks, wherein sub-information (sub-digital data, see the abstract) is recorded so as to be superimposed on the main data by deformation of a shape or a pattern of the recording mark or position displacement of the recording mark in accordance with the sub-information, the sub-information being subjected to data conversion on medium inherent information or apparatus nullification information that is recorded based on the information recording medium (see for example the abstract and page 32, which describes the sub-digital data that include key information relating to the medium inherent information, is recorded by edge displacement of the main data, i.e. taken to be deforming the shape of the recording mark) , as set forth in claims 1-12.

Art Unit: 2627

The reference further teaches: the medium inherent information includes BCA (see for example page 38, lines 16-20), as set forth in claims 2, 3, 8 and 11; and the data conversion of the sub-information includes pseudo random number sequence that is generated using an initial value a key obtained using the medium inherent information (see for example page 38, lines 3-16), as set forth in claims 4-7, 9, 10 and 12. See also the description of the figures for further details relating to the limitations as set forth in the claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Nagai et al. (2006/0039262) discloses an optical disk recording apparatus capable of recording sub-information with the main information.
